Since 1995, Firestorm Wildland Fire Suppression has worked with homeowners and agencies to help educate and reduce the threat of devastating wildfires in the wildland urban interface. Wildfire threat reduction recommendations generally require that homeowners have a **100 feet of defensible space around their home**. We can help develop and implement an environmentally friendly approach to **FIRE HAZARD REDUCTION**. Our equipment and crews perform any complexity of projects from small to large to fit the needs of property owners.

This year Firestorm Crews removed numerous acres of flammable vegetation as part of the outstanding fire prevention efforts conducted by communities throughout California and Nevada.

Call the professionals at FIRESTORM Wildland Fire Suppression TODAY to schedule a WILDFIRE SAFETY CONSULTATION & EVALUATION to REDUCE THE HAZARDOUS FUELS on your property.
